

## Back Office System for Independent Fuel & Convenience Retailers

Engauge is a simple, modern, and transformative solution for Independent Fuel & Convenience Retailers who are frustrated by over-complicated, licensed-based, and dated Back Office Systems (BOS). Engauge is the only cloud-based BOS that enables you to update pump & inventory pricing, reconcile fuel data, and automate and run reports from anywhere, on any device, in real-time.

- Update pump prices, price books, & inventory **from anywhere, anytime.**
- No more manual print outs and calculations, digital records **at the click of a button.**
- **Ready-made reports** with the insights to make better decisions, with better data.
- **Simple**, modern, & uncomplicated.

*Engauge BOS dashboard displaying sales, fuel volume, merchandise, and other key business metrics.*

## Why Choose Engauge BOS

### REMOTE ACCESS

Control & manage pump prices, pricebooks, & inventory from anywhere, on any device.

### REAL-TIME

Get the information you need, at any time, without disrupting your cashier operations or waiting around until close-of-business.

### EASY REPORTING

With the click of a button generate simple, easy-to-read digital reports providing real-time data on your important business metrics.

### INTUITIVE

Everything you need without the complexity & over-complicated systems. Our BOS is modern and easy to use.

### BULLOCH POS INTEGRATION

Fully integrated with Bulloch Point of Sale systems. Detail is automatically imported from your POS, meaning no room for human error or time-consuming manual entry.

### ACCOUNTING

Integrate with accounting software to gain access to business insights such as Month-over-Month transactions, profit centers, etc.

### INVENTORY & PRICEBOOKS

Update pricebooks from any device, remotely, without interrupting cashiers or waiting until closing. Your systems have a back-up: simply export and upload to your POS system to return to operations.

### FUEL RECORDS & REPORTING

Track your fuel metering and inventory within the back office system to generate automated reports for when compliance officers ask for regulatory information.
